Camera System Lab - Student

Location Israel - Haifa

Job Overview Qualcomm Israels R&D centers in Haifa serve as hubs of semiconductor innovation in the vibrant Israeli high-tech industry. The center in Haifa, established in 1994, is located near the Technion, Israels leading institute of technology. For more than 20 years, the Haifa centers engineers and scientists have continued to develop technology breakthroughs in various areas that enable Qualcomm to deliver value to the Companys collaborations with device manufacturers and developers. The Digital team in Qualcomm Israel delivers IPs and systems into all Qualcomm chips, using state-of-the-art methodologies for design and verification. Qualcomm is using the most advanced process technology and our IPs are used in many of the hottest smartphones and tablets in the market today.

The position is with the growing Camera system team.

As a student in the Camera system team, you will take part in digital camera related work which includes: lab tools development, lab automation, content acquisition and research support.

Qualifications:

- At least two years to graduate
- CS or EE faculty
- Experience with programming in Python, C++ and MATLAB (advantage)
- Knowhow in photography and videography
- Good technical skills, able to work in the camera lab

Education Requirements:

- CS or EE faculty student

To be considered for this role, please submit your CV and supporting documents in ENGLISH
