

# BRING YOUR FRIENDS TO WORK AT CCD

## We are looking for a Formal Verification student

Formal Verification is an innovative technology which aims for full and complete verification of hardware designs, and assure zero bugs. FV is now an integral part of the chip design process, and FV expertise has become highly desirable.

Ready to face that challenge? Apply now: [gal.varidi@intel.com](mailto:gal.varidi@intel.com)

- ❖ Verify hardware RTL designs at pre-silicon early development stages.
- ❖ Learn and dive into new technologies, methodologies, and tools.
- ❖ Define and develop Formal Verification environments
- ❖ Use industry leading edge tools and methodologies
- ❖ Earn a unique profession - become a Formal Verification expert.

Wish to be that future expert? Apply now: [gal.varidi@intel.com](mailto:gal.varidi@intel.com)

- ❖ BSc/MSc Student for CS / EE / CE or similar
- ❖ Completed at least 3 semester and with at least 2 semesters till graduation.
- ❖ Ability to work at least 20 hours a week.
- ❖ Fast self-learning abilities
- ❖ Accurate, precise, focused and able to dive into details
- ❖ Independent worker and a team player with high communication skills
- ❖ Knowledge in computer logic, mathematic or theory of CS - an advantage

Do you know a student who may qualify for this? Recommend now:
