

Software Development Engineer

- PTC Haifa

DESCRIPTION

PTC, a global provider of CAD, PLM, IoT and AR solutions, is looking for an experienced Software Developer to join our team at the development center in Haifa, Israel. The team is part of a global group – working on developing top 3D MCAD tool (Creo). As a software developer in Creo organization, your main responsibilities are to diagnose and treat software problems that rise in new product development stages or as a result of customer complaint to a shipped component as well as lead new product development projects. At this role, you will be working in a scrum team communication with technical product managers and QA teams.

If you are curious, collaborative, and motivated and have a desire to be part of something great, then your place is with us!

REQUIREMENTS

- Proficient in C/C++, OOP, good understanding of microservice architecture.
- Proven experience working on large scale projects
- Fast learner both independently and guided by mentor
- Ability to set goals and provide accurate status reports
- BSc/MSc in Computer Science or related fields

Apply for this job and send your CV to email address: ptc.D3.32A@applynow.io
