

Do more with your career

Do you enjoy solving challenging problems?

Do you feel comfortable working with many cross-functional teams in a fast-paced, agile, and dynamic environment?

Do you have a deep passion for learning?

If this describes you, we would love to hear from you!

### **Who are we?**

The VIA team, a world-leader in CPU software tools, is looking for team players and ambitious **excellent software engineering students in their last year of Bachelor, Master or Phd.** studies.

### **What will you do?**

You will develop tools for future CPU architectures that drive the world.

Our team works with a variety of programming languages, starting from low-level assembly and up to C++ or Python.

We believe in long-term mutual growth and invest in teaching you the inner workings of Intel's leading processors and the fundamentals of BIOS, operating systems, compiler optimizations, and more.

You will be joining a winning team, which is taking a critical part in bringing Intel's future products to the world.
