

Software Engineer

The Software Engineering team delivers next-generation application enhancements and new products for a changing world. Working at the cutting edge, we design and develop software for platforms, peripherals, applications and diagnostics — all with the most advanced technologies, tools, software engineering methodologies and the collaboration of internal and external partners. Join us as a **Junior Software Engineer** on our **PowerFlex** development team in **Israel** to do the best work of your career and make a profound social impact.

What you'll achieve

As a junior software engineer you will be responsible for developing cutting edge software while providing creative solutions based on our business needs.

You will:

- Work with top tier customers on a high-performance software defined distributed storage product
- Design, develop, test, and integrate code for new or existing software
- Review and implement test strategies for software products
- Troubleshoot software reliability and performance issues
- Drive idea generation for new software products or for the next version of an existing product
- Currently work remotely from home and return to hybrid/full working from the office (Haifa/Herzliya-Glil Yam) in the future.

Essential Requirements:

- Bachelor's degree in computer science, computer engineering or electrical engineering
- Personally - Team player, highly motivated, methodical approach
- You have to send us your grade sheet when you apply and your CV

Desirable Requirements

- Knowledge in C/C++, operating systems and algorithms, software architectures and application, understanding of hardware and software interactions
- 0-2 years of Hands on experience with one or more of the following: storage, device drivers, databases, networking, embedded software/firmware development, Linux

Here's our story; now tell us yours

Dell Technologies helps organizations and individuals build a brighter digital tomorrow. Our company is made up of more than 150,000 people, located in over 180 locations around the world. We're proud to be a diverse and inclusive team and have an endless passion for our mission to drive human progress.

What's most important to us is that you are respected, feel like you can be yourself and have the opportunity to do the best work of your life -- while still having a life. We offer excellent benefits, bonus programs, flexible work arrangements, a variety of career development opportunities, employee resource groups, and much more.

We started with computers, but we didn't stop there. We are helping customers move into the future with multi-cloud, AI and machine learning through the most innovative technology and services portfolio for the data era. Join us and become a part of what's next in technology, starting today.

You can also learn more about us by reading our latest Diversity and Inclusion Report and our plan to make the world a better place by 2030 [here](#).

Dell is committed to the principle of equal employment opportunity for all employees and to providing employees with a work environment free of discrimination and harassment. All employment decisions at Dell are based on business needs, job requirements and individual qualifications, without regard to race, color, religion or belief, national, social or ethnic origin, sex (including pregnancy), age, physical, mental or sensory disability, HIV Status, sexual orientation, gender

identity and/or expression, marital, civil union or domestic partnership status, past or present military service, family medical history or genetic information, family or parental status, or any other status protected by the laws or regulations in the locations where we operate. Dell will not tolerate discrimination or harassment based on any of these characteristics. Dell encourages applicants of all ages. Read the full Equal Employment Opportunity Policy [here](#).
