

We are excited to say that Vayyar now got new offices at Haifa. As we increase our base at this lovely city, we are opening our doors to the opportunity of working in one of the leading companies at the field of 4D imaging radar.

We are looking for excelling BSc and MSc students and recent graduates in Computer Science to join our crazy, creative and motivated teams in Yehud and Haifa!

Our energetic startup environment empowers you to learn new topics every day, understanding both the depth of the design, as well as the overall system considerations.

You will use our cutting edge technology to take signal processing into the day-to-day world of business and industry.

### **Job Requirements:**

- Eager to learn and grow in a fun environment
- Well-established in Signal Processing – an advantage

### **You have a competitive advantage if...**

- You graduated from a BSc & MSc in Computer Science or Engineering with honors
- You have extensive knowledge of Signal Processing
- You have relevant experience in technological army units/start-ups
