

Embedded Software Student

Annapurna Labs, as part of Amazon Web Services, is looking for talented engineers, to help us develop a semiconductor platform based on revolutionary architecture. Take part in the development of cutting-edge products within a disruptive system architecture. You'll have the opportunity to work on the technologies that power the world's largest Cloud provider, in a dynamic, open, fast-paced environment. AWS provides a highly reliable, scalable, low-cost infrastructure platform, which powers hundreds of thousands of businesses in 190 countries around the world.

For more information we invite you to watch the 2021 re:Invent keynote:
