Come build the future with Amazon!

Northern and Central District

Software Engineer

Annapurna Labs as part of AWS, is looking for talented engineers to help us develop the semiconductor platform which is based on revolutionary architecture. Take part in the development of cutting-edge products within disruptive system architecture. You’ll have the opportunity to work on the technologies that power the world’s largest Cloud provider, within a dynamic, open, and fast-paced environment. Amazon Web Services provides a highly reliable, scalable, low-cost infrastructure platform in the cloud that powers hundreds of thousands of businesses in 190 countries around the world.
