

## Web Developer

Herzliya, Israel, Full Time

CYE is building a data-driven cybersecurity optimization SaaS platform that allows organizations to continually improve their cyber resilience. Our platform helps organization assess their overall security, quantify the risks in business terms and fix the weakest links in their networks.

We are looking for a Frontend Web Developer to build functional and efficient website. As a Frontend Web Developer at CYE, you'll lead every aspect of the process - from idea generation, marketing analysis and technical design through to development and deployment of CYE's website across a variety of technologies.

If you're a passionate developer with a knack for frontend technologies, we'd like to meet you.

## Responsibilities

- Design and implement major features on the CYE website and on other platforms.
- Build reusable code and libraries for future use.
- Integrate the front-end aspects of the web application.
- Collaborate with UX/UI designers to convert designs into the state-of-the-art websites.

## Qualifications

- 1+ year of experience as a Web Developer.
- 1+ year of experience with HTML5, CSS3 and Javascript.
- Experience building user interfaces for websites and/or web applications.
- Ability to convert comprehensive layout and wireframes into a modern HTML pages.
- Knowledge of browser troubleshooting and debugging practices and techniques.
- Knowledge of how to interact with RESTful APIs and formats.
- Strong understanding and experience with PHP development- Advantage.
- Extensive knowledge and experience of building WordPress websites- Advantage.

- Experience with UX/UI and web design- Advantage.
