Associate Professional Services Consultant

Job ID: 1704411 | AWS EMEA SARL (Israel Branch)

DESCRIPTION

Do you want to experiment with innovative technologies, including Cloud Computing, Machine Learning, and Internet of Things? Are you passionate about educating, training, designing, and building enterprise cloud computing solutions for a diverse and challenging set of customers?

Amazon Web Services (AWS) is seeking recent graduates, early career professionals, and advanced career professionals with limited technical experience interested in jump-starting a career as an Associate Professional Services Consultant.

Successful hires will be put through the Professional Services Consultant Program or the Tech U program depending on your specialization. These are accelerated workforce development programs focused on helping recent graduates and early career professionals build technical and professional skills to jump-start technical careers at AWS. The program features cohort-based training followed by on-the-job-training. You will complete specialized curriculum, shadow AWS experts, and receive coaching and on-the-job training to help you succeed in your new role.

Residents will also prepare to take the certification exams for AWS Certified Cloud Practitioner and AWS Certified Solutions Architect – Associate. During the program's On-the-Job training phase, you will prepare for additional certifications that align to your role.

Are you ready to embrace the challenge? Come build the future with us.

Associate Professional Services Consultant-
As an Associate Professional Services Consultant, you will partner with customers and several AWS teams to craft highly scalable, flexible and resilient cloud architectures that address customer business problems. As a trusted customer advocate, you will help organizations understand best practices around cloud-based solutions, and how to migrate existing workloads to the cloud. You will have the opportunity to help shape and execute a strategy to build min-share and broad use of AWS within organizations

The program offers the opportunity to specialize in an area of interest including:

· DevOps Specialist - A leader in building advanced computing systems that harness

continuous integration/continuous deployment pipelines and utilize the strengths of cloud computing to build scalable and economical systems for clients.

· Cloud Infrastructure Architect - An expert in cloud-based networking and system rollouts. CIAs specialize in network performance, infrastructure provisioning, and building Application Programming Interfaces (APIs)

· Application Developer - AppDev resources are specialists in designing applications that run natively in the cloud. They are experts in building programs that run on any number of platforms including virtualized instances, containers, or server less architecture.

· Data & Analytics - Data & Analytics role supports our services that leverage data and produce business insights, which may include using Machine Learning/Artificial Intelligence (ML/AI). Helping our customers use and integrate Big Data services in what is arguably our industry's most exciting space. The portfolio of services covers EMR (Hadoop), DynamoDB (NoSQL), MongoDB, and Apache Cassandra

· Security Consultant - supports our services that have a focus on enabling security specialists using AWS Services including Identity Access Management (IAM), GuardDuty, Shield, Key Management Service (KMS), CloudTrail, CloudHSM, Inspector etc. Within AWS, security is job zero, and we believe that solid security practices are the foundation for using the Cloud. We are looking for candidates who are passionate about working with products targeted for security professionals.

Inclusive Team Culture

Here at AWS, we embrace our differences. We are committed to furthering our culture of inclusion. We have ten employee-led affinity groups, reaching 40,000 employees in over 190 chapters globally. We have innovative benefit offerings, and host annual and ongoing learning experiences, including our Conversations on Race and Ethnicity (CORE) and AmazeCon (gender diversity) conferences. Amazon's culture of inclusion is reinforced within our Leadership Principles, which remind team members to seek diverse perspectives, learn and be curious, and earn trust.

Work/Life Harmony

Our team puts a high value on work-life harmony. It isn't about how many hours you spend at home or at work; it's about the flow you establish that brings energy to both parts of your life. We believe striking the right balance between your personal and professional life is critical to life-long happiness and fulfillment AND WE encourage you to find your own balance between your work and personal lives.

Mentorship & Career Growth

Our team is dedicated to supporting new members. We have a broad mix of experience levels and tenures, and we're building an environment that celebrates knowledge sharing and mentorship. Our senior members enjoy one-on-one mentoring. We care about your career growth and strive to assign projects based on what will help each team member develop into a better-rounded engineer and enable them to take on more complex tasks in the future.

Note:
Applications are reviewed on a rolling basis. For an update on your status, or to confirm your application was submitted successfully, please login to your candidate portal. Please note that we are reviewing a high volume of applications and appreciate your patience.

BASIC QUALIFICATIONS

· A degree in Computer Science / Engineering / Mathematics / Technology / Related science/technical field OR equivalent training, certifications, and/or experience (0-2 years).
· Interest and aptitude to learn about and deliver cloud-based solutions to customers.
· Experience with one of the programming languages like Java, Python, Ruby, Node.js, C#, or C++ OR the interest and technical ability to learn a programming language.
· Written and verbal communication skills and ability to effectively articulate technical challenges and solutions to both large and small audiences.
· Fluent proficiency in English.

PREFERRED QUALIFICATIONS

· Demonstrated ability to adapt to new technologies and learn quickly.
· Experience with Networking fundamentals including Security, Storage or Databases (Relational and/or NoSQL), Operating Systems (Unix, Linux, and/or Windows)
· Experience with software development lifecycle (SDLC) and agile/iterative methodologies; Experience with infrastructure as code, ops automation, and configuration management tools such as Chef, Puppet, or Ansible.
· Knowledge of the primary AWS services such as EC2, ELB, RDS, VPC, Route53, and S3.
· Experience around implementing cloud-based technology solutions - in a school project or while working for a company.

Associate Professional Services Consultant – Public Sector

Associate Solution Architect

Job ID: 1852148 | AWS EMEA SARL (Israel Branch)

DESCRIPTION

Are you passionate about collaborating with technology and business leaders to deliver cloud-based solutions?

Amazon Web Services (AWS) is seeking recent graduates, early career professionals, and advanced career professionals with limited technical experience interested in jump-starting a career as an Associate Solutions Architect and participating in the AWS Tech U program to advance their technical and professional skills.

AWS Tech U is 12 month accelerated workforce development program focused on helping recent graduates and early career professionals build technical and professional skills to jump-start technical careers at AWS. The program features a six-month cohort-based training followed by six months of on-the-job-training. You will complete specialized curriculum, shadow AWS experts, and receive coaching and on-the-job training to help you succeed in your new role and work towards.

Residents will also prepare to take the certification exams for AWS Certified Cloud Practitioner and AWS Certified Solutions Architect – Associate. During the program's On-the-Job training phase, you will prepare for additional certifications that align to your role.

Are you ready to embrace the challenge? Come build the future with us.

Associate Solutions Architect
As an Associate Solutions Architect, you'll help your customers successfully implement cloud technologies. You'll solve complex, technical challenges so your customers can focus on their business. This includes using your knowledge to craft scalable, flexible, and resilient cloud architectures. You'll drive technical solutions discussions, diving deep into the details with customer teams.
Building relationships to understand our customers is key. As a trusted technical advisor, you'll use your interpersonal skills to influence a variety of stakeholders from technical teams to executives. You'll help ensure their short-term technology decisions are aligned with their long-term goals. Speeding up the adoption of our services will be part of your day to day.

You'll also act as an evangelist in the wider community. This includes taking part in

educating, sharing best practices, presenting at events, writing white papers, blogs, and running workshops. You won't just want to be part of an industry movement; you'll want to be leading it. As a Builder, you'll also have the chance to shape the direction of our products and services. This is through gathering feedback from customers whilst collaborating with our engineering and service teams.

Inclusive Team Culture
Here at AWS, we embrace our differences. We are committed to furthering our culture of inclusion. We have ten employee-led affinity groups, reaching 40,000 employees in over 190 chapters globally. We have innovative benefit offerings, and host annual and ongoing learning experiences, including our Conversations on Race and Ethnicity (CORE) and AmazeCon (gender diversity) conferences. Amazon's culture of inclusion is reinforced within our Leadership Principles, which remind team members to seek diverse perspectives, learn and be curious, and earn trust.

Work/Life Harmony
Our team puts a high value on work-life harmony. It isn't about how many hours you spend at home or at work; it's about the flow you establish that brings energy to both parts of your life. We believe striking the right balance between your personal and professional life is critical to life-long happiness and fulfilment AND WE encourage you to find your own balance between your work and personal lives.

Mentorship & Career Growth
Our team is dedicated to supporting new members. We have a broad mix of experience levels and tenures, and we're building an environment that celebrates knowledge sharing and mentorship. Our senior members enjoy one-on-one mentoring. We care about your career growth and strive to assign projects based on what will help each team member develop into a better-rounded Solutions Architect and enable them to take on more complex tasks in the future.

Note:

Hiring for March and September 2022 TechU program start dates.

Applications are reviewed on a rolling basis. For an update on your status, or to confirm your application was submitted successfully, please login to your candidate portal. Please note that we are reviewing a high volume of applications and appreciate your patience.
