Computer vision @ Amazon Last Mile

We are looking for interns to join our team in Haifa and in the US.

What’s in it for you:

- Super-interesting – map building and additional products based on dash cams installed in Amazon delivery vehicles
- You will learn a lot: in vision, software, work processes and how things are done in big-tech
- Work with people who are experienced and nice to work with
- Unbounded growth/development potential

A typical candidate:

- Good grades through undergraduate studies
- Studying towards a Master’s or PhD
- Computer vision experience

What’s important to us:

- Clean and organized work and code writing
- Consistent progress
- Willingness to work across disciplines of research, software, data handling, experiments and writing/presenting
