

Software Team Leader

Description

About the Role

Hands-on software leader with a passion for building scaled robust infrastructures and mentoring high-performing teams. We're looking for a **Software Team Lead** to drive our next-generation software foundation, lead strategic modernization efforts, and shape the future of our platform.

This is a unique opportunity to make a significant impact in a high-tech environment, where innovation, performance, and quality code are top priorities.

What You'll Do

- **Lead Software Infrastructure Modernization:** Drive the redesign and renewal of our core software infrastructure, including:
 - Introducing and implementing architectural changes to support new infrastructure directions.
 - Migrating file-based storage systems to modern relational or NoSQL databases.
 - Refactoring and transforming legacy codebases to modern, maintainable C#.
- **Advance Test Automation Frameworks:**
 - Establish and enhance test automation infrastructures.
 - Expand test coverage across the system to improve quality and confidence.
 - Optimize test performance and execution times.
- **Enhance CI/CD Capabilities:**
 - Extend and optimize the CI/CD pipelines for speed, reliability, and scalability.
 - Embed quality and automation deeply into the development workflow.
- **Hands-On Technical Leadership:**
 - Act as the technical authority in the team—leading by example through code.
 - Ensure high code quality through design and code reviews.

Requirements

What We're Looking For

- Proven experience as a **Tech Lead** and **Team Lead** in a software development environment.
- Strong coding in **C#** and deep understanding of software design principles.
- Experience with **infrastructure modernization**: legacy code refactoring, database migrations, and architectural evolution.
- background in **automated testing**, including infrastructure and best practices is an advantage.
- Excellent communication skills and a passion for team collaboration and mentorship.
- A proactive approach, curious mindset with a drive to improve systems and processes.
